Foreword

On behalf of my fellow Councillors, I am proud to present the 2022-2026 Delivery Program which details how Council intends to work towards delivering the community's goals over the next four years.

Community consultation was undertaken to develop a Regional Community Strategic Plan (CSP), a united plan for the communities of Councils who make up the Canberra Region Joint Organisation. The Regional CSP pulls together extensive consultation that the councils have undertaken to provide a document that identifies the community's local and regional priorities and expectations for the next twenty (20) years, and to plan strategies to achieve those aspirations. The current decisions we make as communities will contribute significantly to what our lives will be like in 2042. The benefits of having a document such as the Regional CSP is that it helps us make decisions that will move us closer to the future we all strive for.

To achieve what we want by the year 2042, the CSP needs to be broken down into more achievable objectives. A rolling 4-year Delivery Program is a smaller component of the long-term vision, providing ongoing opportunities for community feedback to ensure Council is on track for the future.

Yass Valley Council continues our commitment to our community to be financially responsible. This commitment ensures that we keep our costs under control to enable us to continue to deliver the services our residents require and to invest in infrastructure renewal and maintenance so critically needed. One of the greatest challenges for all councils, particularly in rural areas, remains the need to balance the provision of real improvements for local communities with the need to undertake essential maintenance and renewal works on local infrastructure, and to do so with limited resources.

The 2022-26 Delivery Program allows Yass Valley to step forward with confidence to allow Council, in conjunction with our residents, to be ready to face the challenges of tomorrow. I look forward to your thoughts on the 2022-26 Delivery Program we have put forward, as your ongoing feedback is essential to allow us to plan for you and our future generations.

Allan McGrath Mayor

Introduction

All Council's in New South Wales are required to undertake an Integrate Planning and Reporting (IP&R) process. The primary document is the Community Strategic Plan (CSP). The CSP document is prepared by Council, in consultation with the community, that outlines the outcomes the community would like to see achieved in the Local Government Area over a minimum period of ten years.

The Delivery Program is a document prepared by the Council, which describes the activities it has prioritised to progress the long term strategic outcomes contained in the CSP over a 4-year period. Each of the activities described in the Delivery Program has an identified link to a strategic outcome contained in the CSP. While the Delivery Program describes what the Council has prioritised, it is a 4-year document, which enables several important planning documents to be developed.

Annually, the Council will prepare an Operational Plan and a 10-year Long Term Financial Plan, which details the actions that will be taken and how they may be funded. These plans are linked to the activities described in the Delivery Program.

The integration and clarity within these three documents enable Council to understand the long term financial requirements, particularly those that relate to the maintenance and renewal of Council's assets, and the staff required to undertake the actions and activities.

Council staff will report Council's progress against the Delivery Program on a six-monthly basis and those reports will be considered at a Council meeting. This Delivery Program will be reviewed by Council annually. If necessary, Council will make minor updates to the document. If significant changes are made to the document, it will be placed on exhibition and adopted by Council after considering all the submissions that are received.

Context

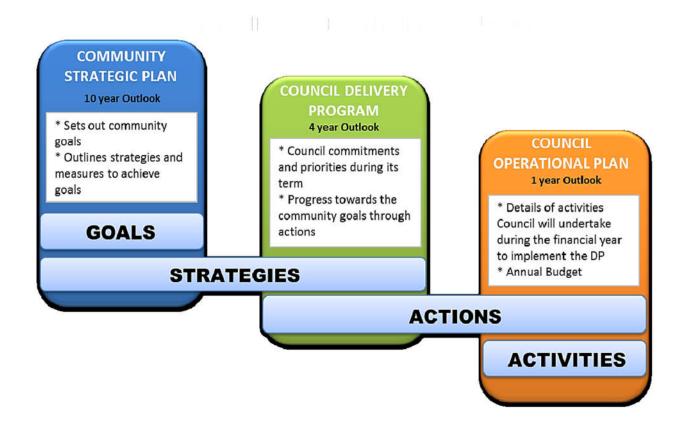

This Delivery Program has been developed as a response to the Community Strategic Plan. It is Council's list of priority actions over the next four years in progressing the things the community has told Council are important.

The content of the Delivery Program has been arranged in the same order as the Community Strategic Plan, meaning each section of the Delivery Program can be read in the context of the Community Strategic Plan.

Strategic direction

How to read this Delivery Program

Each Delivery Program activity is identified as being an 'action' which progresses a strategy contained within the Community Strategic Plan. An example is provided below:

Our Community's Vision

The Community Vision developed and included in the Community Strategic Plan is:

To build and maintain sustainable communities while recognising and respecting the environment and First nations people of the country.

Council's role

Council has a role to Provide, Collaborate or Advocate. For the purposes of CSP and this Delivery Program the roles are defined as:

- Provide: services, facilities, infrastructure, programs, planning, and engagement
- Collaborate: partner with the community, business and industry, and other tiers of government
- Advocate: amplify the voice of our community to get the best possible outcomes

Outline of stakeholders, partners, agencies

The main stakeholder group for Council is our community of residents.

Other stake holders include businesses and non-government organisations within the Yass Valley local government area, including charity, not-for-profit, service groups, and clubs.

State government agencies are also Council stakeholders as they will be providers of services or funding for services and infrastructure within the LGA such as Police, Health, and Transport. Council also acknowledges that there are other stakeholder agencies such as the Office of Local Government, the Independent Commission Against Corruption, the Office of the Information and Privacy Commissioner, and the Office of the NSW Ombudsman, who rely on Council as a source of information.

At the Commonwealth level, agencies provide funding to the community and Council through the provision of grants. Residents of Council interact with Commonwealth agencies such as Centrelink, Medicare, National Disability Insurance Agency, and the Department of Veteran's Affairs.

Budget Forecast for each CSP Theme

The Delivery Program assists Council in developing a financial forecast for the funding required over a 4-year period, to enable delivery of actions that are identified as priorities. The 4-year budget forecast is shown at the beginning of each CSP Theme.

Workforce Strategic Plan

The Delivery Program assists Council to develop its Workforce Strategic Plan. Considering the activities and services contained in the Delivery Program Council determines the number and types of staff required to deliver the services and activities.

Asset Management Plan

Council's assets include roads, drains, water, sewerage, parks and recreation areas, and public buildings. Their lifecycle and condition can be difficult to determine and are subject to the impacts of adverse climatic conditions and natural disasters. The lifecycle costs of these assets can be large and difficult to determine and often the financing of works goes through peaks and troughs as grants become available.

Council's responsibility for the operation, maintenance, renewal, and upgrade of community assets places a significant burden on its budget. To ensure that Council maintains a sustainable asset base, detailed analysis and difficult decision making are required.

Evaluation

How will we evaluate success of the Delivery Program?

Assessing the success of the Delivery Program is knowing when we have completed an activity and understanding the results of completing the activity. As an example, a Council activity might be providing traineeships for young people starting their working career.

While the activity is considered complete when the trainee finishes the training and is awarded the qualification, it is equally important to understand whether the person went on to find further

employment because of the traineeship. For example, having two trainees be awarded a qualification is one measure of the completion of the activity, having both trainees find ongoing employment utilising the qualification is a measure of the value of conducting the activity.

Measuring progress and success

Council will review the progress made conducting activities and the outcomes of completed activities each six months. The six-monthly progress report will be tabled at an Ordinary Meeting of Council following the close of the reporting period. The report will be publicly available on Councils website.

Assessment methods

Assessment methods will be described in each activity recorded in the Delivery Program. Assessment methods may include, but not limited to, council and external survey results or the comparison of data from one reporting period to the next.

Indicators of success

Indicators of success will be described in each activity recorded in the Delivery Program. Indicators will describe, as far as possible, the data source for the indicator.

CSP Theme: Our Community (CO)

We are a network of vibrant, inclusive, and diverse communities that value our rural lifestyle.
