

# Monthly NSW Health Testing Results Report

**Program:** Yass Water Treatment Plant  
**Date Collected:** 02 May 2023

The Australian Drinking Water Guidelines (ADWG) include two types of measures:

- a **health-related guideline value**, which is the concentration or measure of a water quality characteristic that, based on present knowledge, does not result in any significant risk to the health of the consumer over a lifetime of consumption; and
- an **aesthetic guideline value**, which is the concentration or measure of a water quality characteristic that is associated with acceptability of water to the consumer; for example, appearance, taste, and odour.<sup>1</sup>

Yass Valley Council reports both Guideline measures in the interests of transparent governance.
